We find the following, concerning some Springfield people, in the Palatka (Florida) Daily News, of April 10:

Interlaction appears to be a flourishing as well as an ambitious little place. Three years ago there was hardly a house "between the lakes," while now many elegant homes grace this beau'iful spot, and by actual count fiteen hou es are being erected or are just receiving their finishing touches, including an imposing hotel building of torty-five rooms, which is being erected by the Winter Resert Company, under the superintendence of Mr. G. W. Hastings. Mr. R. L. Wall is erecting a new two-story store building, the second floor is to be used as a ball for public entertainments, etc., and Mr. L. S. Hall will have his wood factory and general jubi establishment in operation by the lat of May. There are eight business houses open now, being Messrs. Moler & Cadlard, C. C. Barbour, B. Gillett, W. S. Hall, J. F. Woodberry, J. M. M. Erskine and C. A. Brush, all of whom carry very good stocks of goods. Dr. O. S. Whipp, in connection with his practice, is also proprietor of a neat little drug store, which is constantly enlarging.

Mr. W. H. Vaughn, principal of the Pleas ant street school, was greeted with an agree able surprise about halt-past nine Wednesday night. His many triends met in the parlor of Mr. and Mrs. Wm. So overcome was he that he forgot the usual mode of saluting his write.

Among the guests from a distance were Miss Franklin and Mr. Clemons, of Toledo. After many happy greetings and social conversation of an hour and a half the guests were invited into the dinin -- room, where a pleasant repast was prepared for them. To this part of the programme they did justice. There were many valuable presents to Mr. he was allowed to depart. Gratitude seems and Mrs. Vaughn. The toast by the principal was one worthy of note and not to be torgotten. He concluded by saying he hoped to see snother such an occasion with his triends of this city.

An Evenlag at the Barracks. The crowds at Salvation Army headquar ers are increasing at every muster. Last night it was the largest yet, the greater portion being people who seldom come within sound of such words as are there spoken. Last night there were present the pastors o several city churches and quite a representation of church people. There was the best of order throughout, the policeman on duty having nothing to do but to keep the passage clear. One of the S. A. officers, a young W. The newly-made "recruits" sat upon the stage and assisted. One of the hymns sung from the "War Cry" begins: "We are the Springfield Soldiers, so noble and true, our message is 'salvation,' so freely offered you," the chorus running: "I'm s-a-v-e-d, I am; I know I am," in which the audience joined as they caught the tune. The leader read the parable of the "tares and

Said No. 2 in reply: "Naw! I should my it didn't." What more was said on the subject the reporter didn't hear, as be passed along about his busiress, but this much be actually did hear, and it furnishes food for sebe thought. The bawdy house dances which used to be held in the ball now occupied by the "Army" did make business so good for the saloons that sometimes it wasn't pleasant or safe for decent people to pass along there late at night. Frank Van Tress, one of the two men arested night before last for disorderly conduct on a street corner, was re-arrested yesterday afternoon. Shortly after the arrest et the two Wednesday night, a triend of one of them appeared and gave bail for both in the sum of \$20. Yesterday morning Frank and his companion in misery went up the Mayor's office and pleaded guilty, receiving a See of \$1 and costs each. The fines and costs for both cases amounted to about \$12. which was taken out of the bail money and the remaining \$8 handed over to Van Tress. He, in place of returning this to the rightful owner, quietly pocketed it and turned a deaf ear to all requests for its return. He also managed to get pretty well filled up again in the course of the day, and, we may my "cut fat hog" generally. He was arrested by officer Fred Mast yesterday afternoon and put in the station house. He gave security for the return of the money to its owner, so the charge against him was withdrawn and to be one of the salient features in Frank's

The revised by-laws were acted upon and adopted as a whole. The most radical change made is in the adoption of a section fixing the Post meetings for every Thursday evening, instead of first and third Thursdays of each month. The committee thought this would

be for the best interests of the Post. It was decided to hold a service in the Post hall at 2:30 the afternoon of the Sunday preceding Memorial Day, which will be Sunday, May 24, Chaplain Delo to deliver the address. A committee to make arrangements for that service was appointed by Commander Penfield as follows: Comrades O. N. Bartholomew, D. C. Putnam and W. H. Grant.

Wheels Not Made of Pulp.

"The statement that the most delicate watch wheels are now made of paper pulp in Germany is a hoax, I think," said a prominent jeweler and watchmaker on Broadway to a Mail and Express representative. "I have been in the business over forty years and work on German, Swiss, English, French, and American watches every week, repairing or taking them apart, and I have not seen a wheel made of pulp, not even among the latest watches from Germany. Then from my knowledge of machinery necessary to Then from my make a watch and run it for several years I do not think that pulp by any process whatever can be made hard enough to be of use. Brass and stee are chiefly used to make watch wheels. Platina is too hard to work and too costly, and gold will not do for many

Paper buckets and boats are made, but they have no special friction com-pared to that of a watchwheel, which runs in cogs all the time. Suppose a process was discovered to harden pulp to a degree equal to steel; then the question is, would it last as long as steel? I think not. Car wheels are Steel and brass are metals form natural processes during the course of many hundred centuries. Paper o pulp hardened by artificial means when not subject to constant friction may be equal to steel or brass for certain pro-cesses, but I imagine its durability course, can be used for a time as cog wheels in watches, and many other temporary tough materials, but they are simply for exhibition and not utility. So many watches are made in Switzerland I wonder they have not substituted some cheap material for steel and brass, but I didn't expect the Germans to start at it first. Indeed, my firm opinion is that it is a mistake about pulp being used even for big cog wheels, much less small, delicate ones."—New York Mail and Express.

Dr. Goersen, who was executed in Philadelphia several weeks ago, had a very ingenious arrangement whereby he was enabled to read at night. As there was neither a gas jet nor a lamp allowed in his cell he was obliged to de vise some means to aid him to pass away the time in reading. He obtained a sheet of tin, and after brightening it he placed it outside his window a such an angle as to catch the rays of light from a gas lamp in the kitchen yard, sixty feet away. These rays were then concentrated inside of his cell by means of a magnifying glass, and by placing his book or paper near the glass obtained enough light to read
